Human Allograft Products for Practitioners

1. Human Allograft Bone

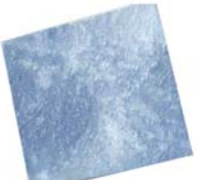

Donated cadaver bone (small, ground cortical sizes; 250-1000 microns, gamma irradiated bone). This bone is used in areas of the jaw where there's a missing via extraction tooth or teeth. The longer the extraction/edentulous site is free-standing and not filled with a regenerative product such as Grand-Oss, Syn-Oss, or Grand Tri-cortical Block (below), the more bone loss will occur. These products are available in the following sizes:

Product Name	Sizes (in CC)	
Grand Cancellous Powder	0.5, 1.0, 2.5	
Grand Bone Matrix Powder	0.25, 0.5, 1.0, 2.5	
Grand Demineralized Bone Matrix Powder	0.25, 0.5, 1.0, 2.5	
Grand Cortical/Cancellous, Demineralized	0.5, 1.0	
Grand Cortical/Cancellous, Mineralized	0.5, 1.0	
Grand Syn-Oss (Synthetic Collagen)	1.0	

Grand Cancellous Cubed	15.0	
Grand Tri-cortical Block	2x3x2 cm	

2. Human Cadaver Tissue

These tissue grafts are gamma irradiated and used in dental procedures such as connective tissue, keratinized tissue, membrane and other intra-oral soft tissue dental applications. These products are available in the following sizes:

Product Name	Sizes (in CM)	
Grand Dermis Soft Tissue Graft	1x1, 1x2, 1x4, 2x2, 2x4	
Grand Fascia Lata	2x3, 3x4, 2x7	
Grand Pericardium	1x1, 2x2	

3. Human Allograft Putty

Donated cadaver bone (mixed with a binder): putty is a product that is made up of 89% human bone with the rest being composed of a setup catalyst used to harden the bony paste into a solid substance. All content of the putty is gamma irradiated. Putty can be used by itself as a bone filler; however, a large percentage of specialists will use the putty in conjunction with bone by mixing different ratios of the two products together, depending on the procedure or the area's surgical site. The upper bone of the maxilla is softer than the lower side so upper bone can be mixed with demineralized and lower bone can be mixed with mineralized bone. These products are available in the following sizes:

Product Name	Sizes (in CC)	
Grand DBM Putty	1.0
